Hello again,

Here's a great article from the National Post dated May 24. The experts have been telling us that rates aren't likely to move up too soon or for too long. We now have the media reporting on this. And in case you're wondering, we still have 5 year fixed rates at 5.30%, 7 yr fixed at 5.40% and the variable as low as Prime less 0.90%.  
Call me when I can help more!
